**Subject:** HYSPLIT smoke plume forecast TPC fire:6 am Thu 11.28.19

Here is the link to the latest run of the HYSPLIT for the TPC fire incident from 6 am CDT Thursday 11.28.19.

It looks like the main trajectory of the plume will continue to move westward across the Jack Brooks Regional Airport, Nederland, and Port Neches through the morning.

By late morning winds above the surface will increase and become more from the southeast and south. This would allow the main trajectory of the plume to shift to

more to a northwest direction this afternoon and towards the Central Gardens area, Lamar University, and possibly the west end of Beaumont.
